

### Important Note

In the principle of general education that only courses outside of a student's major programme could be counted towards fulfillment of general education requirement, students should take note that the exclusion criteria barring a student from taking a general education course that falls within the student's own major applies not only when the student enrolls in a course. By the time of graduation, if a student's declared major is in conflict with the exclusion criteria of any of the general education courses taken, these courses cannot be counted as fulfilling the general education requirement.

This situation could likely happen to students taking general education courses before they have yet declared a major, e.g., students of broad-based admissions, or to students who have changed their major after they have taken some general education courses. Students should therefore have the full responsibility to monitor carefully if their declared majors or changed majors could result in any of the general education courses taken earlier becoming invalid in fulfilling general education requirement.

### 重要提示

基於通識教育的原則，同學修讀的通識教育課程需為其主修課程以外的範疇，方可用作符合通識教育要求。同學必須留意，某些課程列明個別主修同學不可選讀，該限制不止適用於同學修讀時。當同學畢業時，如其申報主修和任何一個已修讀的通識課程的修讀限制有衝突時，該些課程均不可用作符合通識教育要求。

上述情況有可能在同學未申報主修前發生，例如：經大類收生入讀的同學，又或在修讀某些通識教育課程後轉讀其他主修的同學。因此同學必須密切留意，因其申報主修或轉讀主修，可能引致之前修讀的任何通識教育課程不被認可作為符合通識教育要求。
