This course offers me opportunities to practise on how to communicate with others at ease.

Learning how to turn empathy into words is my biggest takeaway from GES2480.

I am grateful that Shaw College has been funding my study through scholarships and awards which gives me the recognition to keep myself motivated under pressure. All the opportunities and encouragement that I have received from Shaw College will be my driving force to conduct interdisciplinary drug research abroad, then bringing novel research ideas and skills back to Hong Kong.
