

Important Notice

Recently there has been a serious outbreak of COVID-19 in Hong Kong, while some students were found to be involved in group activities, such as playing mahjong, having hotpot, etc., in student hostels.

COVID-19 is widespread among global and local communities, and there has been an increasing number of infected groups. Medical studies have demonstrated that the virus can be transmitted through respiratory droplets and air, and has imposed serious threats to public health.

Public health is our top concern especially in this critical time. Should students be found to have involved in the aforementioned activities or those threatening the health of others, the College must take action seriously. The case will be passed to the College Disciplinary Committee for further handling. The residence of students concerned will be disqualified immediately, and the residence in 2020/21 of all students involved will also be affected.

Due to the severity of the pandemic, your understanding and cooperation is much appreciated.
